

Below is the link for the download and also instructions for the install and configuration to make sure it works.

https://my.vmware.com/web/vmware/details?downloadGroup=CART20FQ2_WIN_510&productId=863&rPid=34526 ← Installation file

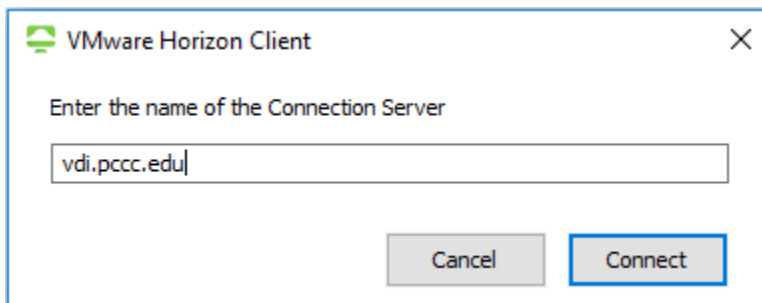

1. Download the Horizon Client from the Link Above.
2. Once Downloaded run the executable file
3. Agree to the installation using the default settings

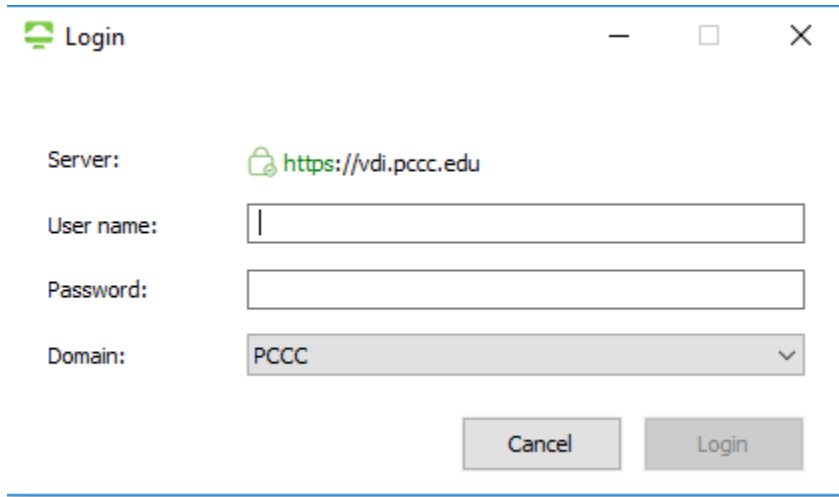

4. Reboot your Machine after installation has completed.
5. Open the VMware Horizon Client and Click the “New Server” button in the upper left hand corner.

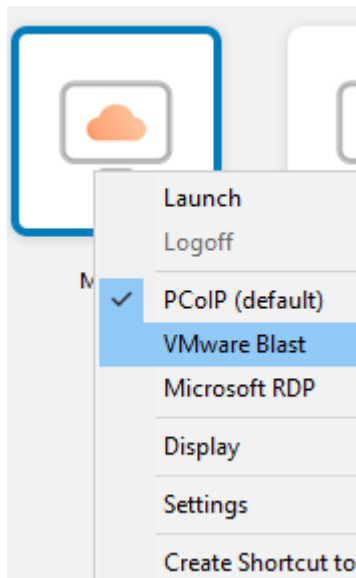

6. In the dialog box that opens up enter “vdi.pccc.edu” and click Connect

7. Make sure the Domain is set to "PCCC" if you are faculty or "STUDENTS" if you are a student. Then enter your Username and Password.

8. On the Desktop Pool Icon Right Click and Verify the Display settings are set to PCoIP

9. Once Confirmed double click the Icon to launch the VDI Desktop
